Stringency index

For how many of the 47 LDCs have measures been recorded?

# Stringency index

The Stringency index is calculated using nine indicators, combining various measures of government responses, to capture a variation in containment and closure policies only. It records the number and strictness of government policies, not the appropriateness or effectiveness of a country's response.

# Legend:

#### **Stringency Index**

Least stringent (0)

Most stringent (100)

## Stay at home order

- No measures Recommended
- Required with exceptions Required without exceptions

#### Workplace closure

No measures Recommended Required for some sectors Required except essential sectors

## School closure

No measures Recommended Required for some levels Required for all levels

**Source:** CDP Secretariat, calculated based on data from Oxford COVID-19 Government Response Tracker (https://covidtracker.bsg.ox.ac.uk/)
