

## **Annex tables**

## List of tables

A. 1	Developed economies: rates of growth of real GDP, 2003-2013.....	143
A. 2	Economies in transition: rates of growth of real GDP, 2003-2013.....	144
A. 3	Developing economies: rates of growth of real GDP, 2003-2013.....	145
A. 4	Developed economies: consumer price inflation, 2003-2013.....	147
A. 5	Economies in transition: consumer price inflation, 2003-2013.....	148
A. 6	Developing economies: consumer price inflation, 2003-2013.....	149
A. 7	Developed economies: unemployment rates, 2003-2013 .....	151
A. 8	Economies in transition and developing economies: unemployment rates, 2002-2011 .....	153
A. 9	Major developed economies: quarterly indicators of growth, unemployment and inflation, 2009-2011 .....	155
A.10	Selected economies in transition: quarterly indicators of growth and inflation, 2009-2011 .....	156
A.11	Major developing economies: quarterly indicators of growth, unemployment and inflation, 2009-2011 .....	157
A.12	Major developed economies: financial indicators, 2002-2011 .....	159
A.13	Selected economies: real effective exchange rates, broad measurement, 2002-2011 .....	160
A.14	Indices of prices of primary commodities, 2002-2011 .....	162
A.15	World oil supply and demand, 2003-2012.....	163
A.16	World trade: changes in value and volume of exports and imports, by major country group, 2003-2013 .....	164
A.17	Balance of payments on current accounts, by country or country group, summary table, 2002-2010.....	166
A.18	Balance of payments on current accounts, by country or country group, 2002-2010 .....	167
A.19	Net ODA from major sources, by type, 1990-2010 .....	170
A.20	Total net ODA flows from OECD Development Assistance Committee countries, by type, 2001-2010 .....	171
A.21	Commitments and net flows of financial resources, by selected multilateral institutions, 2001-2010 .....	172
A.22	Greenhouse gas emissions of Annex 1 Parties to the United Nations Framework Convention on Climate Change, 1990-2013 .....	173

**Source:** UN/DESA, based on data of the OECD and Eurostat.

**a** Unemployment data are standardized by the OECD and Eurostat for comparability among countries and over time, in conformity with the definitions of the International Labour Organization (see OECD, *Standardized Unemployment Rates: Sources and Methods* (Paris, 1985)).

**b** Data for country groups are weighted averages, where labour force is used for weights.

**c** Partly estimated.

**d** Baseline scenario forecasts, based in part on Project LINK and the UN/DESA World Economic Forecasting Model.

**e** Not standardized.

**Source:** UN/DESA, based on data of the Economic Commission for Europe (ECE); ILO LABORSTAT database and KILM 6th edition; Economic Commission for Latin America and the Caribbean (ECLAC); and national sources.

**a** As a percentage of labour force. Reflects national definitions and coverage. Not comparable across economies.

**b** Partly estimated.

**c** End-of-period registered unemployment data (as a percentage of labour force).

**d** Georgia officially left the Commonwealth of Independent States on 18 August 2009. However, its performance is discussed in the context of this group of countries for reasons of geographic proximity and similarities in economic structure.

**e** New methodology starting in 2005.

**f** Urban areas.

**g** Break in series: new methodology starting in 2003.

**h** Six main cities.

**i** Break in series: new methodology starting in 2002.

**j** Thirteen main cities.

**k** Covers Quito, Guayaquil and Cuenca.

**l** Metropolitan Lima.

**m** Special Administrative Region of China.

**n** Partly adopts the ILO definition; that is to say, it does not include one ILO criterion, namely, "currently available for work".

**o** Break in series: new methodology starting in 2005.

**p** Excluding Northern and Eastern provinces.

**Source:** JPMorgan Chase.

**a** Indices based on a "broad" measure currency basket of 46 currencies (including the euro). The real effective exchange rate, which adjusts the nominal index for relative price changes, gauges the effect on international price competitiveness of the country's manufactures owing to currency changes and inflation differentials. A rise in the index implies a fall in competitiveness and vice versa. The relative price changes are based on indices most closely measuring the prices of domestically produced finished manufactured goods, excluding food and energy, at the first stage of manufacturing. The weights for currency indices are derived from 2000 bilateral trade patterns of the corresponding countries.

**b** Average for the first ten months.

**c** Special Administrative Region of China.

**Source:** UN/DESA, based on data of the United Nations Framework Convention on Climate Change (UNFCCC) online database, available from [http://unfccc.int/ghg\\_data/ghg\\_data\\_unfccc/time\\_series\\_annex\\_i/items/3814.php](http://unfccc.int/ghg_data/ghg_data_unfccc/time_series_annex_i/items/3814.php) (accessed 10 November 2011).

**Note:** Based on the historical data provided by the UNFCCC for the GHG emissions of the Annex 1 Parties up to 2009, DESA/DPAD extrapolated the data to 2013. The extrapolation is based on the following procedure:

- GHG/GDP intensity for each country is modelled using time-series regression techniques, to reflect the historical trend of GHG/GDP. While the trend for each individual country would usually be a complex function of such factors as change in structure of the economy, technology change, emission mitigation measures, as well as other economic and environmental policies, the time-series modelling could be considered a reduced form of a more complex structural modelling for the relations between economic output and GHG emissions.
- GHG/GDP intensity for each country is extrapolated for the out-of-sample period (2010-2013), using parameters derived from the time-series regression model.
- In some cases, the extrapolated GHG/GDP intensity for individual countries was adjusted to take account of announced emission control measures taken by Governments.
- The projected GHG emissions were arrived at using GDP estimates in accordance with the *World Economic Situation and Prospects 2012* baseline forecast and the extrapolated GHG/GDP intensity.

**a** Without land use, land-use change and forestry.

**b** Estimated.

**c** Baseline scenario forecasts.
